

GEHWOL®

Everything for the well-being of the feet.

Internationally renowned Gehwol® foot care line

GEHWOL® is internationally recognized as a high quality line of foot care products since its creation in Lübbecke, Germany in 1868 by the pharmacist Eduard Gerlach.

A village pharmacist catering to the needs of alpine hikers and farmers, Eduard Gerlach understood how extremely painful sore feet can be. He was able to successfully mix fundamental substances such as potassium carbonate, unsaturated fatty acids, mineral based lubricants and disinfecting essential oils to create "E. Gerlach's Preservative Cream" - the first industrially manufactured cream for the prevention and alleviation of foot ailments.

Edward Gerlach received numerous international honors for his "Preservative Cream" - nowadays known as Foot Cream.

Since this first product introduction, GEHWOL® has thrived and expanded into a full scale line of foot and nail care products made with the highest quality natural ingredients. These extensive products offer over 30 different foot care, nail care, and body care products, as well as professional pedicure equipment.

The GEHWOL® line has a solution to every foot care need.

The company came into existence out of a vision and conviction of helping people with foot problems, making foot care accessible to everyone, building expertise in the foot care market, and creating awareness of foot care.

This vision and conviction have turned GEHWOL into a pioneer of modern foot care. Vision, experience, and values have been passed on at GEHWOL from generation to generation. This is how GEHWOL has ensured the success of the family business for 154 years by now.

Three main active substances form the basis of the pro-biotic care concept of GEHWOL balance.

The skin barrier strengthener:

The pro-biotic active substance BIOTILYS® with lactobacillus pentosus promotes the natural reproduction of healthy bacteria of the skin flora and helps to restore balance. It revitalizes and strengthens the natural skin barrier and protects the skin.

Moisturizer:

White tea extract supplies the skin with moisture and protects it against moisture loss.

The Care-Booster:

Sesame oil nourishes the skin, leaving it noticeably smoother and suppler.

WELLNESS

Restore Brittle Nails to Health

by NLS Staff | July 3, 2019 |

Gehwol med Protective Nail and Skin Oil contains ingredients like wheat germ oil, panthenol, and bisabolol to care for the nails and skin. Fragile, brittle nails are made supple and healthy-looking, while the nail's natural silky sheen is restored. Advise clients to massage into the nail bed, cuticle, and surrounding skin twice a day.
